

Technical data sheet

Temperature sensor 26002

The temperature sensor 26002 measures the temperature of pipes and tanks quickly and precisely.

The temperature sensor is connected to a CTLOG 2013 sensor connection module and can be operated with the following SAIER devices:

- PSD dosing system
- DSPset dosing system
- Concept PDG 2906
- DC2418 dosing computer

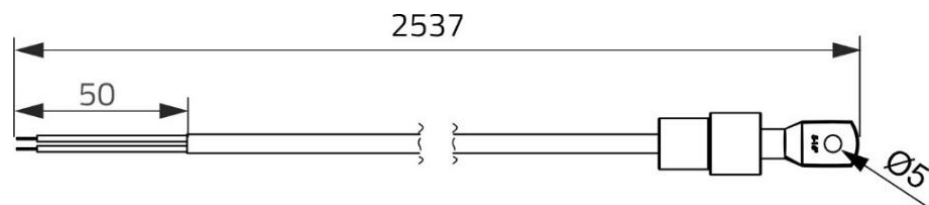

Performance data

Measuring range:	5 ... 85°C
Deviation tolerance:	1%
Power:	0,16 W
Response time:	< 2 sec.

Mechanical data

Dimensions:	37 x 2,8 x 3 mm
Weight:	0,2 kg
Cable:	2,5 metres, 2 x 0,75 mm
Connection opening:	Ø 5 mm
